Implement Booth's algorithm using c-programming

Name: Shruti Gauchandra

Roll Number: 15

Date of Performance:

Date of Submission:

Aim: To implement Booth's algorithm using c-programming.

Objective -

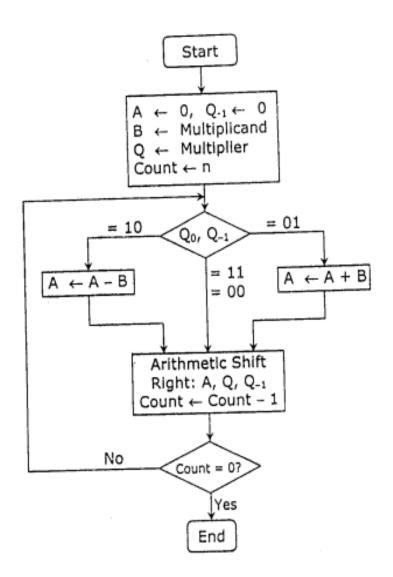

- 1. To understand the working of Booths algorithm.
- 2. To understand how to implement Booth's algorithm using c-programming.

Theory:

Booth's algorithm is a multiplication algorithm that multiplies two signed binary numbers in 2's complement notation. Booth used desk calculators that were faster at shifting than adding and created the algorithm to increase their speed.

The algorithm works as per the following conditions:

- 1. If Qn and Q_{-1} are same i.e. 00 or 11 perform arithmetic shift by 1 bit.
- 2. If Qn $Q_{-1} = 10$ do A = A B and perform arithmetic shift by 1 bit.
- 3. If Qn $Q_{-1} = 01$ do A = A + B and perform arithmetic shift by 1 bit.

Multiplicand (B) \leftarrow 0 1 0 1 (5), Multiplier (Q) \leftarrow 0 1 0 0 (4)										
Steps	Α			Q				Q ₋₁	Operation	
	0	0	0	0	0	1	0	0	0	Initial
Step 1:	0	0	0	0	0	0	1	0	0	Shift right
Step 2 :	0	0	0	0	0	0.	0	1	0	Shift right
Step 3:	1	0	1	1	0	0	C	1	0	A ← A − B
	1	1	0	1	1	0	0	0	1	Shift right
Step 4:	0	0	1	0	1	0	0	0	1	A ← A + B
	0	0	0	1	0	1	0	ο	0	Shift right
Result	0	0	0	1 0	1 0	0	=	+20		

Program:

```
#include < stdio.h >

#include < math.h >

int a = 0,b = 0, c = 0, a1 = 0, b1 = 0, com[5] = { 1, 0, 0, 0, 0};

{
    printf("%d", anumcp[i]);
}
```

Output:

Conclusion -

Implementing Booth's algorithm in C provides an efficient method for multiplying binary numbers using signed integers. This algorithm reduces the complexity of multiplication by transforming the problem into a series of shifts and adds, leveraging the properties of binary arithmetic. By coding Booth's algorithm, you can effectively handle signed multiplication operations, which is particularly useful in low-level programming and digital systems design. The algorithm's systematic approach ensures that multiplication operations are performed accurately and efficiently, even when dealing with negative numbers.
